SALIHA® Multi Clog replacement footbed:
Art.: 71220 black

The SALIHA PU-replacement footbed, with black microfibre upper can be replaced within the SALIHA Multi Clog, without any problems. The microfibre upper is especially soft, dries fast and is kind to the skin.

The anatomically formed footbed supports, stabilizes and exonerates the foot standing up and during movements.

In the area of the middle foot, the natural roll-off and walking movement is positively influenced by the diagonal and along bulge, the pressure on the heel while walking is absorbed tremendously.

Article number: 71220
